NOTES TO USERS

This map is for use in administering the National Flood Insurance Program It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size. The community map repostory should be consulted for possible updated or additional flood hazard information.

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and/or **floodways** have been determined, users are encouraged to consulthe Flood Profiles and Floodway Data and/or Summary of Stillwater Elevation tables contained within the Flood Insurance Study (FIS) report that accompanie tables contained within the Flood Insurance Study (FIS) report that accompanies with FIRM. Users should be aware that BFEs shown on the FIRM represent rating purposes only and should not be used as the sole source of flood elevation information. Accordingly, flood elevation information Accordingly, flood elevation reformation produced in conjunction with the FIRM for purposes of construction and/or floodpian management.

Coastal Base Flood Elevations shown on this map apply only landward of 0.0" North American Vertical Datum of 1988 (NAVD 88). Users of this FIRM should be aware that coastal flood elevations are also provided in the Summary of Stif water Elevations tables in the Flood Insurance Study report for this jurisdiction. Elevations shown in the Summary of Still water Elevations tables should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the National Flood Insurance Program. Floodway widths and other pertinent floodway data are provided in the Flood Insurance Study report for this jurisdiction.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures. Refer to Section 2.4 "Flood Protection Measures" of the Fbod Insurance Study report for information on flood control structures for this

Flood elevations on this map are referenced to the North American Vertical Da of 1988. These flood elevations must be compared to structure and gro us rave. I neise nood elevations must be compared to structure and ground elevations referenced to the same vertical abum. For information regarding conversion between the National Geodetic Vertical Datum of 1929 and the North American Vertical Datum of 1989, visit the National Geodetic Survey website at http://www.noranae.gov/ or contact the National Geodetic Survey at the following address:

NGS Information Services NOAA, N/NGS12 National Geodetic Survey SSMC-3, #9202 1315 East-West Highway Silver Spring, Maryland 20910-3282 (301) 713-3242

To obtain current elevation, description, and/or location information for bench marks shown on this map, please contact the Information Services Branch of the National Geodetic Survey at (301) 713-3242, or visit its website at http://www.ngs.moaa.gov/.

Base map information shown on this FIRM was provided in digital format by the USDA National Agriculture Imagery Program (NAIP). This information was photogrammetrically compiled at a scale of 124,000 from aerial photography dated 2005.

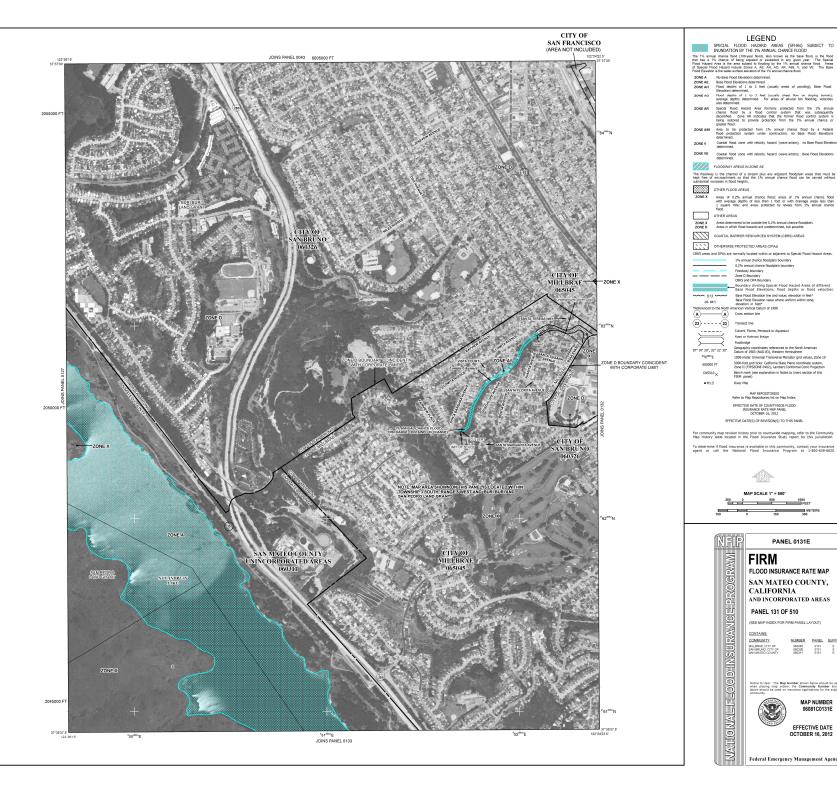

This map reflects more detailed and up-to-date stream channel configurations than those shown on the previous FRM for this jurisdiction. The foodplains and floodways that were transferred from the previous FRM may have been adjusted to conform to these new stream channel configurations. As a result, the Flood Prefless and Floodway Date tables in the Flood insurance Sulty Report (which contains authoritative hydraucic data) may reflect stream channel distances that differ from what is down on this map.

Corporate limits shown on this map are based on the best data available at the time of publication. Because changes due to annexations or deannexations may have occurred after this map was published, map users should contact appropriate community officials to verify current corporate limit locations.

Please refer to the separately printed Map Index for an overview map of the county showing the layout of map penels; community map repository addresses; and a Listing of Communities table confarining National Flood insurance Program dates for each community as well as a listing of the panels on which each community is clusted.

For information on available products associated with this FIRM visit the Map Service Center (MSC) website at http://minclems.gov. Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, and/or digital versions of this map, Mary of these products can be ordered or obtained directly from the MSC website.

If you have questions about this map, how to order products or the National Flood Insurance Program in general, please call the FEMA Map Information exchange (FMA) at 1-877-EMAMAP (1-877-336-2627) or visit the FEMA website at http://www.fema.gov/business/nfip.
